

Reliability of Electronic Assemblies and Additively Printed Strain Sensors for Health Monitoring

by

Devin Taylor

A thesis submitted to the Graduate Faculty of
Auburn University
in partial fulfillment of the
requirements for the Degree of
Master of Science

Auburn, Alabama
August 5, 2023

Keywords: Flip Chip Reliability, Additively Printed Sensors, Flexible Hybrid Electronics

Copyright 2023 by Devin Taylor

Approved by

Pradeep Lall, John and Anne MacFarlane Endowed Distinguished Professor of Mechanical
Engineering

Robert Dean, McWane Professor of Electrical and Computer Engineering

Daniel Harris, Associate Professor of Mechanical Engineering

George Flowers, Dean of the Graduate School

This thesis has been redacted.
